

"Employment Online (<http://www.employment.tn.gov.in>)"

The Professional Employment Exchange Office (PEEEO) caters to the employment needs of professionals registered in Tamil Nadu for the entire state. The PEEEO office comes under the Directorate of Employment & Training, registers the candidates seeking employment opportunities and recommends to various departments / offices requesting suitable professionals. The PEEEO has decided to open their databases for access to the private sector employers, to create more avenues for the registered candidates. The mushrooming growth of private sector employment in this information era necessitates to make online web access of the entire database of registered candidates. In this scenario, the department has created a online web portal for the welfare of candidates and thrown open the entire online database for private sector employment opportunities. The website was launched on 6th June 2003.

Internet 100%

The objectives of this web site are as follows:-

- To develop a Data Bank of highly qualified, marketable candidates from the Live Register of the Employment Exchanges in Tamil Nadu with the accent on persons with professional, executive and engineering diploma and degrees.
- To allow the private sector employers easy access to this database to fill up vacancies arising in their establishments and to offer facilities for screening and short-listing of prospective employees
- To provide online information on application dead lines, hot track careers and future trends in employment
- To set up a Virtual Study Circle for students taking up competitive examinations from +2 level to Junior Research Fellowship examinations
- To publish on the net information on the seniority of registration upto which candidates have been sponsored against vacancies in the Employment Exchanges

Its coverage enables it to play a very pro-active role to achieve the redefined objectives of Private Sector placements, Vocational Guidance, Employment Market Information (EMI), creation of Study Circles to enhance the competitive skills of job-

seekers, special service to the weaker sections of Society and promotion of Self Employment. In one word, act as a one stop shop for all Employment related needs of job seekers, and students. The new vision is to convert the Employment Exchanges in to centres of excellence for empowerment of youth.

New Initiatives from the PEEO

Wooing the private sector for placement of the registrants

The Employment Exchanges have now targeted the private sector for increasing the number of placements effected by them. The share of the private sector in placement has multiplied five fold in the last one year . This figure is expected to increase impressively this year with private sector placement camps slated to be organized in all districts regularly. The objective is to emulate the success of District Employment Offices, Salem, Dharmapuri, Nagercoil and Tiruchirappally where one day of the month is designated as Private Employers Day and both employers and job seekers meet and jobs are offered and taken up on the spot.

Offering a spectrum of Vocational Guidance Services under one roof

Vocational Guidance is the process of assisting an individual to choose an occupation, prepare for it, enter upon and progress in it. The Department has embarked on an ambitious program to identify talent in their early years, create talent banks of high achieving students, nurture them, organize financial support and help them to realize their full potential so that these 'flowers do not blush unseen and waste their sweetness on the desert air'. A pilot project has been launched in the District Employment Office, Tiruchirappally to offer a plethora of useful services to the students, job seekers and parents. These include collection, compilation and dissemination of information on courses and careers, organization of short term training programs to augment competitive skills, establishment of entrepreneurs clubs for providing a support service to PMRY beneficiaries, networking with NGO's and other Government Departments and the Public to offer a spectrum of quality services under one roof.

Study Circles

It is an innovative concept to raise the performance of rural students in the competitive examinations conducted by both public and private recruiting bodies. These study circles have posted an enviable record in a short span. Study circle members in employment exchanges all over the state have come out successful in various competitive examinations conducted by the UPSC, TNPSC, Railway Service Commission, the Staff Selection Commission, the Banks and the Public and Private Companies.

Computerization of Employment Exchanges

In order to provide a transparent, efficient, quick and complaint free service, all the thirty three employment exchanges have been provided with computer systems. Computerized counter services are now offered for registration and issue of identity cards to job seekers.

Online Interactive Web Site cum Portal

In order to encourage private placement, an on-line interactive web-site-cum-portal is set up to develop a data bank of highly qualified, marketable candidates from the Live Register of the Employment Exchanges in Tamil Nadu to allow private sector employers and others for easy access.

Insight into the ‘**online job portal**’ (www.employment.tn.gov.in)

(b) Employers :

The prime objective of the database is to throw open the entire registered job seekers database for prospective employers. The Employers can logon on to the website, draw necessary list of candidates from the website at their requirement. .

The following activities can be performed by private employers

- Sign up for an user-id
- Search the database of candidates
- Post vacancies if any
- View Statistics on the registered jobseekers

Sign up for an user-id:

The Employer has to fill up the logon form , providing the Company Name, Address, the nature of industry, company profile, website address, contact person name, designation etc and keying in their user-id and password for access. Once registered with the web site, the employer at his will can generate necessary lists from the database.

Search the Database:

The Employer based on the manpower requirement, can search into the job seekers database, by filling up the criteria like basic qualification, subject, grade and the combinations, apart from the age, sex, year of experience, domicile etc.

Upon submission of the forms based on the needs, the website will deliver the list of candidates and his communication address, email etc to the employer. The Employer can send the call letter straight away to the best suitable candidates, after looking out the profile of job seekers through the web site.
